EXPERIENCE

10 Years

10 years of experience building everything from startup MVPs to enterprise-scale systems. Now focused on creating innovative, visually striking digital experiences.

MY APPROACH

In the age of AI, I believe **architecture trumps technology**. I work with React, Django, and modern stacks, but I'm framework-agnostic — the right solution depends on your project's unique needs.

AI SYSTEMS

Since 2025, I've been developing AI solutions - from chatbots to automation systems. Currently building AI integrations for travel industry automation (Langchain, RAG, OpenAI/Gemini).

I leverage tools like Claude Code and Antigravity to rapidly build MVP prototypes. Experienced in AI imagery, video content, and automated content pipelines.

EXPERIENCE HISTORY

Freelance / AI Automation

2024 — Present

Building AI integrations, CRM automations, and React/Django apps (Caffitaly, Nuanu).
Focusing on high-speed MVP development using modern AI tools.

Pacha Alpaca

2023 — 2024

Co-founder & Architect

Launched an autonomous alpaca farm business on Bali. Managed full cycle: design, construction, and AI-driven marketing automation.

Action (action.ru)

2020 — 2023

Web Developer

Developed reporting systems and recruitment platforms. Stack: Django, Celery, Postgres, Redis, Sentry, Kibana.

IFK Vremya / Crypto Practice

2018 — 2020

Developed high-frequency trading software, bots, and indicators for crypto markets. Django, React, ZeroMQ, neural networks for trade execution.

Taiga System

2016 — 2018

Full-Stack Developer

Redesign and API development for security systems (Anti-theft). Django, EmberJS, RabbitMQ.

EDUCATION

HSE University, Moscow

2018

Master's Degree

Computer Systems and Networks

HSE University, Moscow

2016

Master's Degree

Industrial Automation & Production Systems

LET'S CREATE SOMETHING

I work with existing designs or collaborate from concept to launch. Open to creative projects, experimental web experiences, and innovative applications.

This site is a live example - built from scratch in one week with a functional admin panel and performance optimization. Interested in something similar? Let's collaborate.
